TITLE Contact card	DRAWING NO. BS-KB-001	REV A
ORIGINATOR Bryant Systems	ISSUED 2026-10-24	SHEET 1 of 8

Every federal proposal starts with a budget.

Before a researcher can submit, someone in finance prices the work, applies the institution's rates, fills out the federal budget forms, and enters it all again in the agency's portal.

> That is at least two hours of a financial manager's time for every proposal built from scratch.

TITLE	DRAWING NO.	REV
The problem	BS-KB-001	A
ORIGINATOR	ISSUED	SHEET
Bryant Systems	2026-10-24	2 of 8

I’ve built these budgets by hand, hundreds of times.

From 2022 to 2026 I was a Space Sector Financial Manager at the Johns Hopkins Applied Physics Laboratory, behind hundreds of NASA and NSF proposal submissions.

NSPIRES | RESEARCH.GOV | GRANTS.GOV

Proposa is the tool I wanted on my desk: a seasoned financial manager’s judgement, available to every researcher on every proposal.

Why I build this	BS-KB-001	A
ORIGINATOR	ISSUED	SHEET
Bryant Systems	2026-10-24	3 of 8

Proposa handles the finance side of a proposal.

Built for sponsored-programs offices and the researchers they support.

FIND Open federal funding that fits a researcher, with comparable past awards. BUILDING NOW	**BUDGET** Compliant budgets with your institution's rates, ready for the SF-424 R&R. BUILT
CHECK Catches identity leaks in files before a dual-anonymous review. BUILDING NOW	**FILL** Enters the finished budget into the agency portal for you. IN DEVELOPMENT

> Status as of 2026-10-24. "Built" means working code with tests today.

TITLE Proposa	DRAWING NO. BS-KB-001	REV A
ORIGINATOR Bryant Systems	ISSUED 2026-10-24	SHEET 4 of 8

Give your finance team its time back.

PROPOSALS YOUR OFFICE SUPPORTS PER YEAR

50 PROPOSALS A YEAR

≥ 100 hours

of financial-manager time on proposal budgets alone, at a floor of two hours per proposal.

AFTER THE AWARD

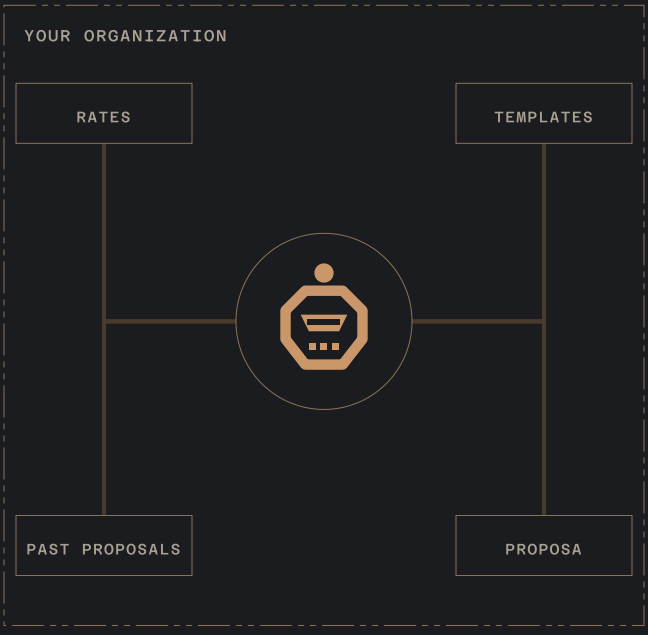

At a lab managing about 250 active awards, keeping the books can take one to two people full time. That is the work Proposa is designed to take on.

Estimates from the founder's experience, not measured customer results.

ARCH-IE: your organization's private AI.

ARCH-IE is the AI operating system behind everything Bryant Systems builds. Inside Proposa it becomes your organization's own AI: it learns your rates, templates and past proposals, and it runs on hardware you control.

> Proposa integration in development. ARCH-IE runs today on an NVIDIA DGX Spark in the Bryant Systems lab.

Bryant Systems	2026-10-24	6 of 8

One engine, several products.

Each one runs on ARCH-IE.

BRYANTFORGE

Turn an idea into a working design suite and automated workflows for small businesses.

GNOMIE

Home projects and task management, indoors and out.

SENTINEL

Westminster Sentinel: local civic intelligence.
